To: Chief, Wireline Competition Bureau

**MAPPING DISCREPENCIES DUE TO AGE OF MAPPING DATA AND  
SOUTHERN OHIO COMMUNICATION SERVICES, INC.  
USDA BIP GRANT/LOAN BROADBAND BUILD**

Southern Ohio Communication Services, Inc. is in the middle of building a robust broadband network with loan/grant funds from the BroadbandUSA.gov funds administered by USDA RUS BIP program. As of December 31, 2011 only a very small portion of this project was under way, during the latter part of 2012 another part of the project was completed. There is a plan to complete the entire infrastructure project by November 2013. The remaining portions of the project will provide up to 10Mbps download and 3Mbps upload services to the census blocks listed on USDA website as funded service area. The map can be found at <http://broadbandsearch.sc.egov.usda.gov/silvermap/broadbandmap.aspx>. The areas we are funded to serve are in Pike and Adams Counties in Ohio. The above listed map should indicate all BroadbandUSA.gov funded projects. All of these projects with respect to NOFA I and NOFA II should be required to provide at minimum the 3Mbps download and 1Mbps upload speeds which meets or exceeds the FCC standards requested in this Docket. We have also worked with Connect Ohio and the State Broadband Initiative in Ohio to try to determine the unserved/under-served areas in the state and have and will continue to expand into these areas.

We are respectfully request the Commission to consider current Government funded projects that are not listed on the map that will provide at least the minimum service levels to be included in the map as served area.

Respectfully Submitted,

January 9, 2013

Southern Ohio Communication  
Services, Inc.
